

# Designated CQN Practice

## Chapter Quality Network

Dear Families,

In our ongoing effort to provide quality care to your child, our practice has been selected by the American Academy of Pediatrics (AAP) to participate in a national project to improve asthma care.

Our practice is working with eleven pediatric groups in California, in collaboration with the AAP-CA Chapter 2, dedicated to improving asthma care. You may notice some changes in our office routines as we enhance our forms and procedures to more effectively align with the national asthma guidelines. You can help us by filling out a questionnaire or answering questions about your child's asthma. If your child has asthma, we will also give you an action plan to help manage your child's symptoms at home.

Our goal is to provide the best care for children who have asthma so that their asthma is well controlled and they can lead happy and healthy lives. If you have questions or suggestions, please let us know!

Thank you for your support!
