DESIRED OUTCOMES

Select and participate in two breakout sessions that provide in-depth clinical information on pediatric dermatology, challenging real-life case studies and toxicology issues.

The presentational method for this activity will be Case Presentation with Learner Participation, Lecture with Q&A, and Small Group Discussion/Roundtable. This activity is geared to meet the educational requirements of Pediatricians. All Physician Specialties, Allied Health Care Professionals, and Nurses are welcome to attend. This activity will encompass the following desirable physician attributes: Medical Knowledge, Patient Care & Procedural Skills, Professionalism, Interpersonal & Communication Skills, and Practice-Based Learning & Improvement.

At the conclusion of this activity, learners will be able to:

- Distinguish, diagnose and treat pediatric dermatological conditions using the most current management approaches
- Develop an office readiness plan for pediatric emergencies in consideration of the unique aspects of office practice, on site resources, types of patients, and potential types of emergencies
- Apply interviewing or screening strategies to assess drug use/abuse in children and work with family members to formulate a plan to intercede
- Recognize and treat common, unusual, or opportunistic infections in pediatric patients
- Discuss the most current updates from the AAP "Red Book" and the implications for pediatric patients with infectious diseases
