DESIRED OUTCOMES

The presentational method for this activity will be case presentation with learner participation, Lecture with Q&A, and Small Group Discussion. This activity is geared to meet the educational requirements of Pediatricians. All Physician Specialties, Allied Health Care Professionals, and Nurses are welcome to attend. This activity will encompass the following desirable physician attributes: Medical Knowledge, Professionalism, Interpersonal & Communication Skills, Practice-Based Learning & Improvement and Systems-Based Practice.

At the conclusion of this activity, learners will be able to:

- Recognize common clinical presentations and parental concerns surrounding gender diversity in youth.
- To provide some take home guidelines with which pediatricians can complement the work of psychiatrists in preventing, treating, and reversing mental disorders in their patients.
- To appreciate how fundamental tenets of infection prevention have and will continue to change, post COVID.
- Discuss the role of air pollution on child health.
- Update membership on progress of key AAP-CA2 policy priorities.
- Identify the health impacts of tobacco use and vaping in youth. And, identify clinical and advocacy tools.
- Explain the emergence and purpose of NCQA and state its goals and participants.
- Recognize the current hyperbilirubinemia guidelines and apply the latest management options.
- Please visit the symposium website for the full list.
